### About Research Guides

The UIC Library is pleased to announce the addition of electronic Research Guides to our growing suite of library services. Research Guides are Web-based guides that provide streamlined access to discipline-specific databases, books, articles and more for study and research.

UIC Librarians welcome the opportunity to collaborate with faculty, create guides customized to meet your research and teaching needs. Please contact [Annie Armstrong](mailto:annie@uic.edu) ([annie@uic.edu](mailto:annie@uic.edu)), Coordinator of Library Instruction at the Daley Library or the Health Sciences library liaison for your discipline to discuss the creation of a Research Guide in time for the Fall semester.

## Research Guides - Search

Search tips: The default search is AND, i.e. it will search for all the words entered. To perform OR search use | character, e.g. hello | world. To exclude words use !, e.g. hello ! world will search for matches where there is the word hello but not world. To search for a phrase enter it in quotes, e.g. "hello world".
